Accelerate Business Outcomes With Flexible Hybrid Cloud

Solutions Engineered for Data-Driven Organizations, by Hitachi Vantara

FIND OUT MORE BELOW

85%

More than 85% of Fortune 100 organizations trust Hitachi Vantara with their data infrastructure needs.

Customers in the top five industries trust Hitachi Unified Compute Platform (UCP) RS with their enterprise apps
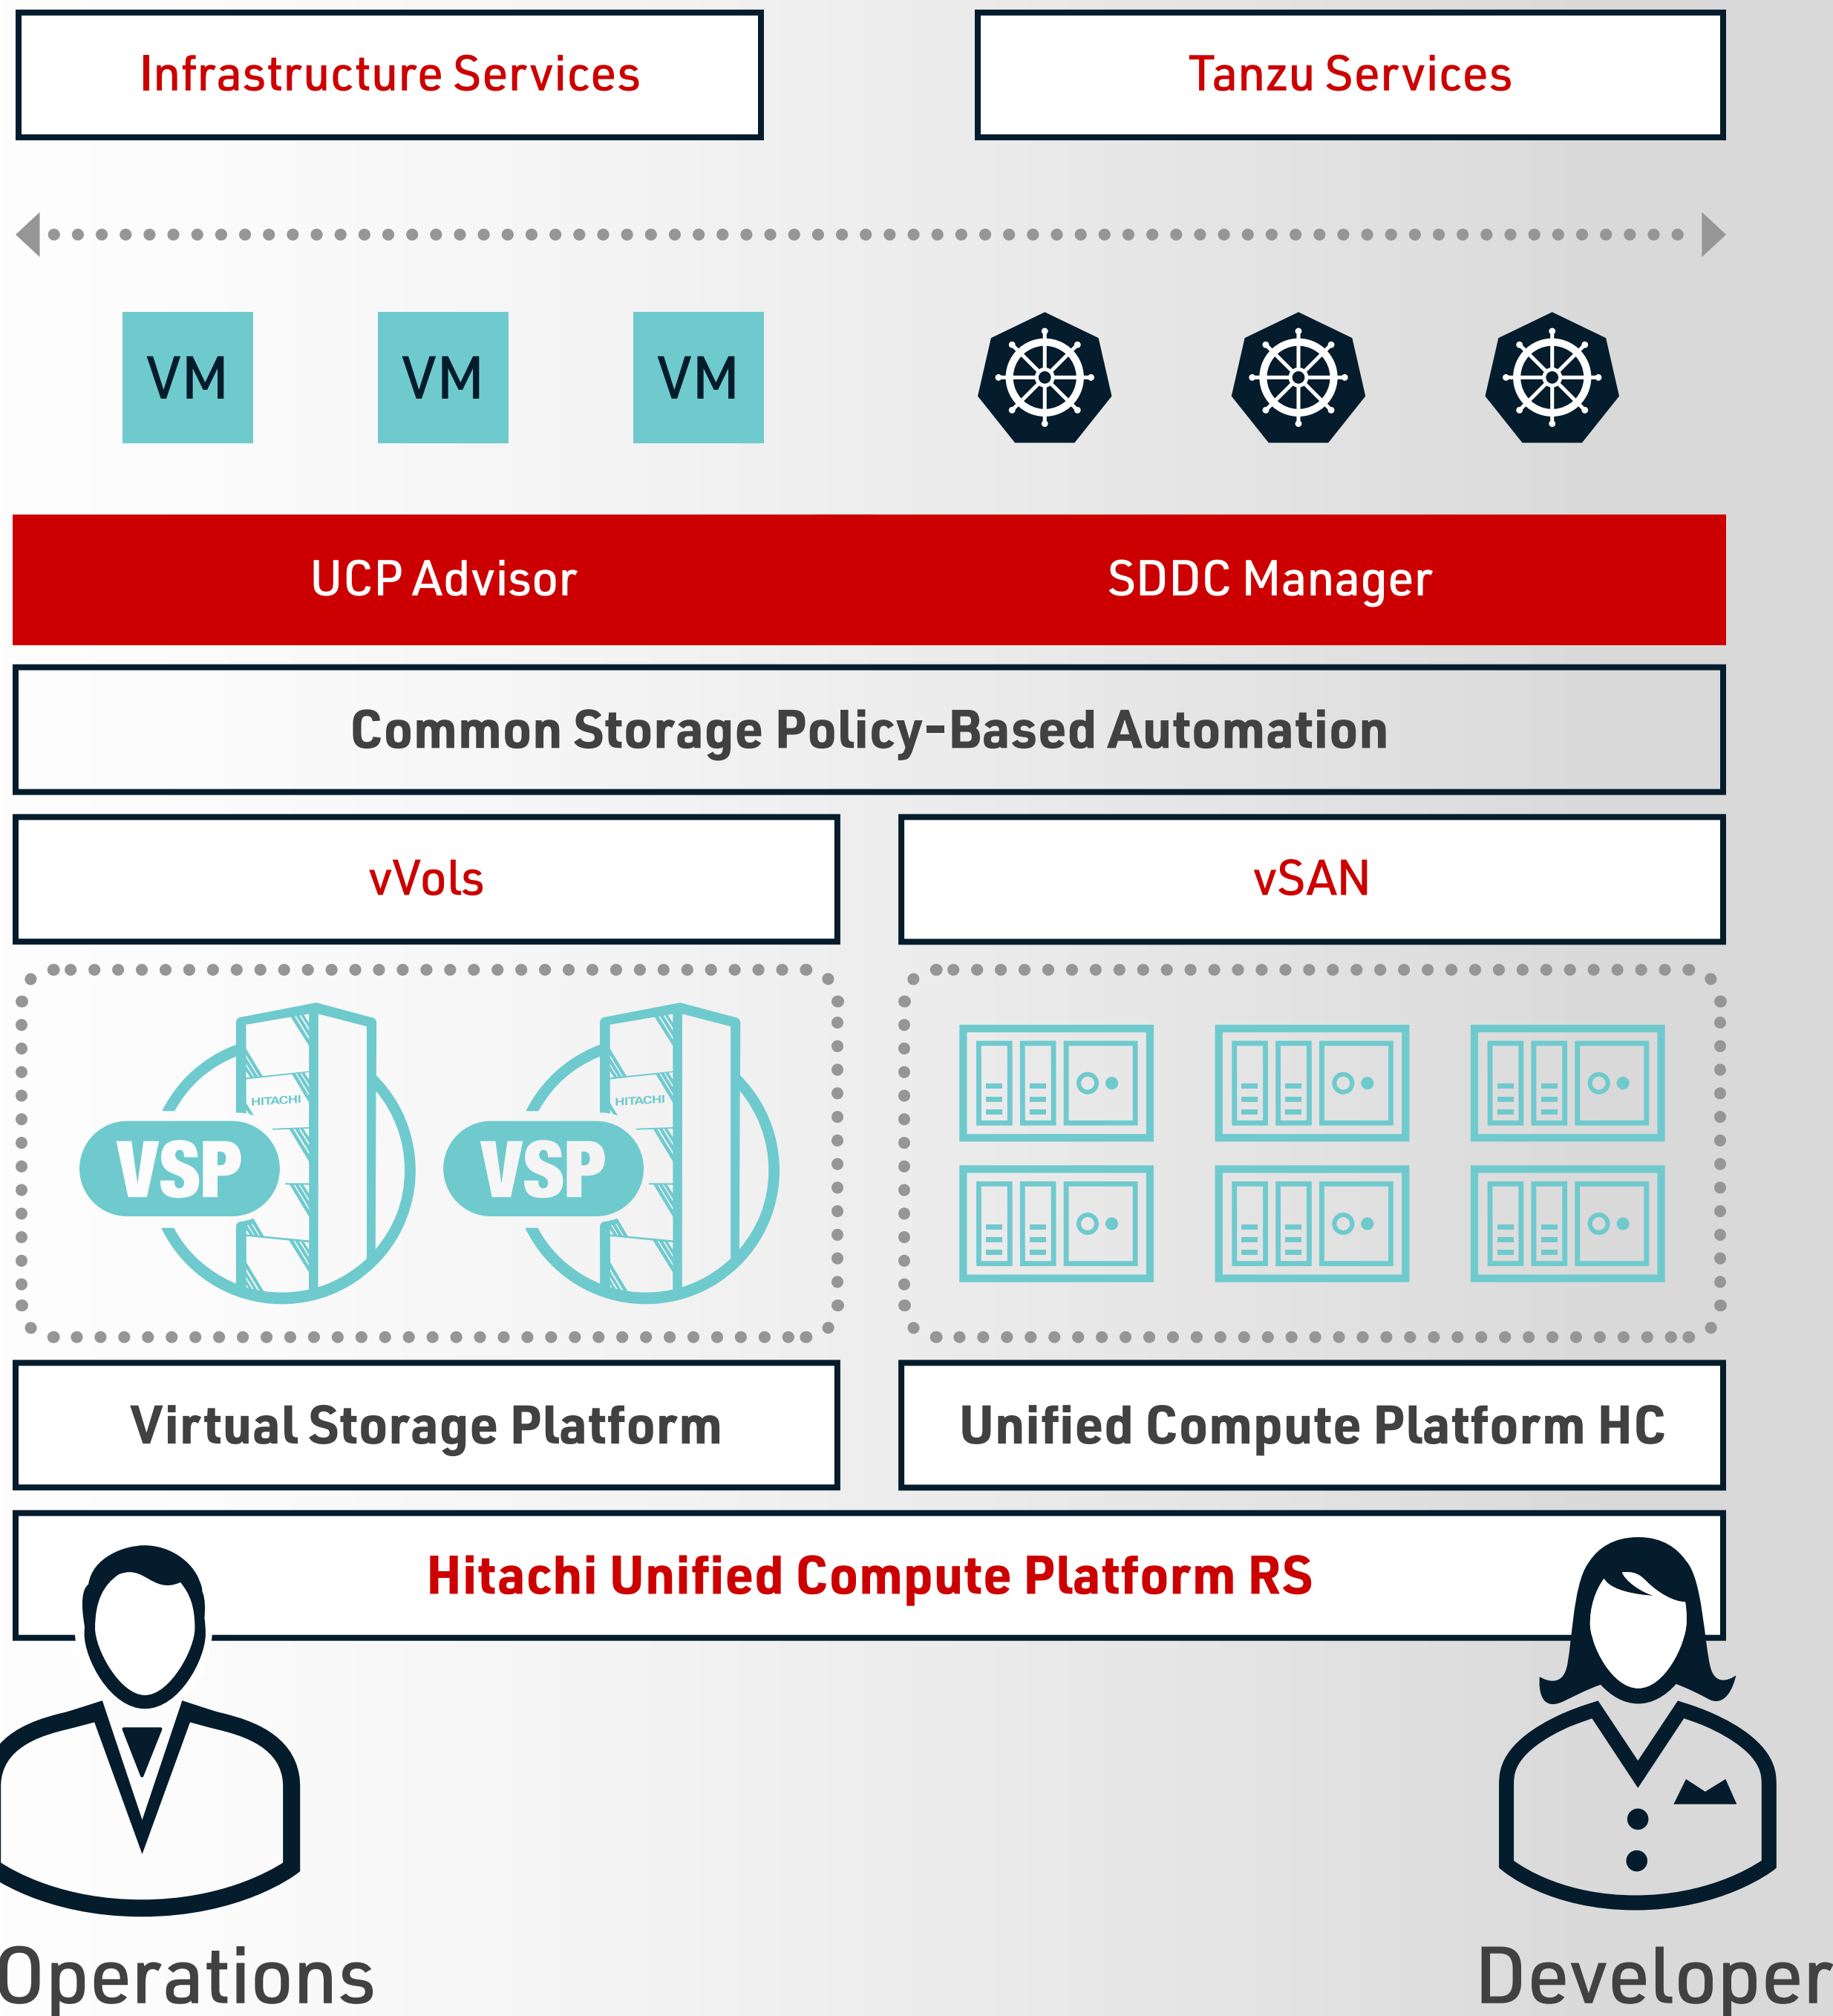

Government

Financial Services

Technologies

Manufacturing

Utilities

Built on a trusted Hitachi-VMware partnership, key use cases for Hitachi UCP RS might include:

- ☑ SAP HANA
- ☑ Databases
- ☑ Microsoft apps
- ☑ Virtual desktops
- ☑ Flexible private and hybrid cloud

Hitachi UCP RS in Action

Example: A customer wants to build apps faster and simplify infrastructure management. Hitachi Solution:

Infrastructure Services	Tanzu Services

VM   VM   VM

UCP Advisor	SDDC Manager

Common Storage Policy-Based Automation

vVols	vSAN

VSP   VSP

Virtual Storage Platform	Unified Compute Platform HC

Hitachi Unified Compute Platform RS

IT Operations   Developer

Customer Benefits

1 **Accelerate** service delivery with policy-based cloud provisioning

2 **Automate** firmware and driver upgrades, including full-stack upgrades including switches for stress-free lifecycle management

3 **Innovate** with a seamless cloud powering your business 24/7, and increase capacity with ease by adding HCI, SAN or HCI Mesh

The Evidence

Why customers choose Hitachi for their hybrid cloud infrastructure:

Faster time to production, with an integrated turnkey solution, powered by VMware Cloud Foundation. Intelligent automation accelerates infrastructure deployment and configuration, reducing provisioning time and complexity by automating hundreds of mandatory tasks.

Flexible to deploy and optimize workloads on the infrastructure that delivers the best SLOs—from HCI, to SAN or public cloud.

Full-stack management with single pane of glass management for hybrid cloud infrastructure, including hyperconverged and converged systems, and common management from edge, to core to cloud.

Future-proofs cloud, core and edge with a powerful modern architecture powered by latest Intel Intel 3rd gen processors and Optane 2nd gen SSD.

Fail-safe performance delivered by the same Intel 3rd gen processors and Optane 2nd gen SSD maximizes app performance.

Join the leading organizations working with Hitachi Vantara for their data infrastructure needs and unlock maximum value from your hybrid cloud environment with our industrial expertise. As a trusted partner to thousands of customers like you for over 50 years, our passion is to continue to push innovation, so you can progress without interruption.
