

Top 7 Reasons to Choose Hitachi EverFlex Data Protection as a Service (DPaaS)

Pay-per-use, OPEX data protection for hybrid cloud environments. Keep data secured and rapidly recoverable—wherever it's located.

01

End-to-end, unified approach

EverFlex Data Protection as a Service (DPaaS), part of the Everflex portfolio of solutions, provides **a complete data protection and cyber resiliency offering** that minimizes complexity **while providing full coverage**. Near-zero backup windows, significantly improved recovery point objectives (RPO) and recovery time objectives (RTO) along with features like backup and recovery and remote replication assure your business stays operational come what may.

02

Self-managed or fully supported

DPaaS provides management in ways that work best for your business—either do it yourself or **free up IT resources** and take advantage of a fully managed solution with ready-to-use SLAs and a comprehensive range of services such as **advanced cloud based analytics, monitoring and reporting**.

03

Predesigned and architected

DPaaS comes with a pretested plan and design to achieve strict RTOs and RPOs and address your business challenges, risk exposures and regulatory requirements. **Reduces the need for specialized expertise and complex, long-term efforts** to build an in-house solution.

04

Array of service classes tailored to meet your needs

DPaaS comes with a selection of service classes to match the criticality of your data, required RTOs and RPOs, backup and restore success rates and more. This approach ensures that the data protection needs of your business are met. Options to customize are always available when needed.

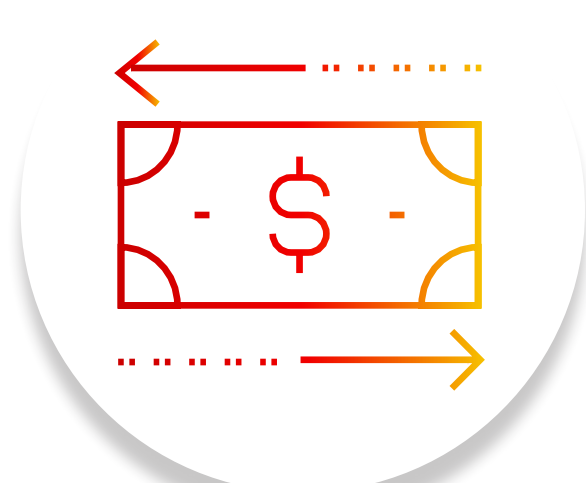

05

Speed time to deploy

Gain deployment efficiency through **pretested and pre-architected design**. This means that instead of spending time building your data protection and cyber resiliency solution, it can be implemented fully ready to meet your most rigorous service level agreements (SLAs) and other requirements.

06

Flexible Subscription Model

Reduce your costs by **only paying for the data protection that you actually use**. DPaaS enables **subscription-based payments**, reducing your costs and improving your ability to plan. Billing is monthly, based on the amount of data protected within each service class and options selected.

07

Availability

100% data availability guarantee for Enterprise and Commercial VSP portfolio-based solutions.
