# Hitachi Vantara IT Infrastructure Residency Services

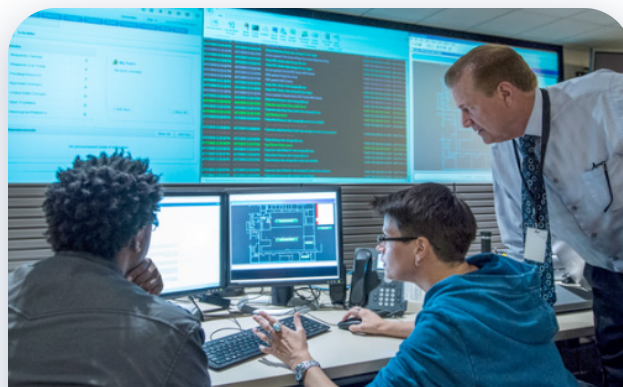

**As technology evolves, the skills gap within IT departments continues to widen. New technologies are being adopted more quickly to keep pace with business changes, necessitating a constant update of skills. Yet, fully outsourcing these skills isn't always the solution, as they are a core part of any IT organization.**

## Filling the Skills Gap

To effectively address this issue, many organizations focus on continually closing the skills gap. This means implementing continuous learning to ensure IT staff have the most current, comprehensive understanding of the technologies they use and manage.

The skills gap also has a tangible impact on the budget. It's essential to bring in the right skills at the right time to avoid unnecessary costs and ensure efficient project execution. By investing in continuous learning and development, organizations can mitigate the budget impact and maintain a competitive edge. To do that we need to invest in and manage several activities and resources:

- **Continual Learning:** Regular on the job training and development programs are essential to keep IT staff updated with the latest technical advancements.
- **Effective Knowledge Sharing:** Creating an environment where management knowledge on the latest technology is shared effectively ensures all team members are equipped with the required skills.
- **Boosting In-House Expertise:** Expanding these skills in-house is crucial, as they form the backbone of the IT organization.

## Client Success

### Vontobel

"We have a great relationship with the local service team and they provided us with extra on-site support during the migration."

### DenizBank

"Hitachi Vantara's professional services team assisted with the implementation and data migration to ensure a smooth transition. Their expertise and dedication were instrumental in achieving our project goals efficiently and effectively."

### Garanti BBVA

"We're excited to continue our trusted partnership with Hitachi Vantara and drive automation to unlock even more efficiencies in the future"

## Hitachi Vantara IT Infrastructure Residency Services

### Hitachi Vantara's Residency Services

At Hitachi Vantara, we understand the importance of having the right expertise at the right time. That's why we offer Residency Services as part of our comprehensive professional service catalog. Our team of seasoned experts are ready to support your IT initiatives, providing the expertise and hands-on skills needed to drive success.

This also helps augment the Hitachi EverFlex Infrastructure as a Service (IaaS) offering and expands the integration of existing heterogeneous infrastructure and tools using Hitachi EverFlex Control.

Whether you're looking to close skills gaps, enhance your team's capabilities, accelerate project timelines or ensure the successful implementation of complex solutions, Hitachi Vantara Residency Services are here to help.

#### Our residency services offer several key benefits including:

- **Immediate Expertise and Insight:** Partner with seasoned professionals equipped with extensive hands-on expertise in Hitachi technology, for consulting, solution architecture and design, workflow design and integration, automation, data orchestration and hands-on expertise with direct links into engineering and support teams.
- **Enhanced Support and Performance:** Our residency services provide hands-on experience with real-world hybrid cloud and AI infrastructure projects, significantly boosting technical skills and knowledge while ensuring comprehensive support.
- **Boost knowledge Transfer:** Entrust us with the technical oversight necessary for swift and efficient infrastructure projects or operations, while we seamlessly facilitate the transfer of critical expertise to your staff.
- **Advanced Integration:** Practitioners can focus on specific IT areas such as hyperautomation, AI, ML, or ITSM integration, allowing your staff to gain firsthand experience and develop expertise in their chosen fields.

- **Risk Mitigation:** With the right skills at the right time, our residency services directly impact the quality and success of IT projects and operations.
- **Alleviate Recruitment Headaches:** Spend less time recruiting and retaining high-quality talent. Our residency services enhance your organization's reputation and provide a steady stream of trained professionals when you need them most.
- **Flexible Resourcing:** Flexibility of residency services, when you need them, drives improved project outcomes and reduced FTE management.

Hitachi residency services can be a crucial component of professional development and project success for Infrastructure as a Service integration and streamlining its operations.

Let Hitachi Vantara augment your existing staff and get on the right track to the most optimal infrastructure and operations performance you can have, giving you a fast start to technology modernization and allowing your existing staff to broaden their skills or focus on more important business priorities.
