

Content Platform Learning Path

Object Storage Administrator

Unlock the Value of Your Unstructured Data

The Object Storage Administrator learning path will help you acquire the skills you need to manage, protect and integrate data with object storage solutions from Hitachi Vantara.

Learning Paths are suggested courses to reach a goal. Individual paths may vary according to experience and requirements.

Getting Started with Hitachi Vantara Object Storage

TXP6759 | 34 Minutes

This free online course provides an overview of Hitachi Vantara Digital Infrastructure Solutions enabled by the Hitachi Content Platform (HCP) and the supporting portfolio of solutions. After briefly reviewing HCP architecture and common use cases, the course provides step-by-step demonstrations on log-in and basic navigation of Hitachi Content Platform. Additional demonstrations guide learners through some of the most common activities performed by the HCP system and storage administrators.

Getting Started with Hitachi Content Product Portfolio

TXP6830 | 40 Minutes

Get a high-level overview to Hitachi Content Product Portfolio. You will learn about Hitachi Content Platform (HCP), Hitachi Content Intelligence (HCI), HCP Anywhere, and HCP Gateway. This course is a first step to learn and master your skills with Hitachi Content Product Portfolio.

Getting Started with Hitachi Content Platform

TXC6787 | 2 Hours

Obtain an overview of Hitachi Vantara Digital Infrastructure Solutions enabled by the Hitachi Content Platform (HCP) and the supporting portfolio of solutions. After briefly reviewing HCP architecture and common use cases, the course provides step-by-step demonstrations on log-in and basic navigation of Hitachi Content Platform. Additional demonstrations guide you through some of the most common activities performed by the HCP system and storage administrators.

Operating and Managing Hitachi Content Platform

TCI2743 | 3 Days

Get an overview of the Hitachi Content Platform (HCP) functionality, concepts, architecture, and processes such as data ingestion, search, and replication. Students will complete numerous hands-on lab activities designed to build the skills necessary to deploy, administer, configure, and integrate the key software products for HCP solutions.

Completion of this course will earn you a [Hitachi Content Platform Administration](#) digital badge.

This course prepares you for the [Hitachi Vantara Qualified Professional - Content Platform Administration \(HQT-6420\)](#) exam.*

If you complete the **Hitachi Content Platform Administration** course and pass the [HQT-6720](#) exam, you will earn the [Hitachi Object Storage Operations and Management](#) digital badge.

Operating and Managing Hitachi Content Monitor

TSI6765 | 1 Day

Receive an overview of the Hitachi Content Monitor (HCM) functionality, concepts, architecture and processes, such as Sources, Dashboards and Monitors. Students will complete numerous hands-on lab activities designed to build the skills necessary to integrate, administer and configure the key software products for HCM solutions.

Completion of this course will earn you a [Hitachi Content Monitor Administration](#) digital badge.

Hitachi Content Platform Retention and Compliance

TCI6776 | 2 Days

Learn advanced skills and knowledge on Hitachi Content Platform (HCP) Retention and Compliance. The course explains how to set up different retention settings and apply them to the objects during data ingestion. Hands-on lab activities are intended to build the skills necessary to reinforce the course material.

Completion of this course will earn you a [Hitachi Content Platform Retention and Compliance](#) digital badge.

Hitachi Content Platform Replication

TXI6754 | 2 Days

Get insight on various link topologies and enables you to understand replication monitoring, failover management and Hitachi Content Platform (HCP) recovery with a replica. Additionally, hands-on lab activities will enable you to gain practical experience and knowledge on how to set up replication between HCP systems.

Completion of this course will earn you a [Hitachi Content Platform Replication](#) digital badge.

Operating HCP with Backup Software

1059CI | 1 Day

This course provides advanced knowledge on how to use Hitachi Content Platform with backup software. You will learn about HDPS and HCP integration and how to use advanced options such as Performance, Threads, Dedup, Block sizes, Object Lock. Additionally, the hands-on lab activities enable you to gain practical experience and knowledge on operating HCP with backup software.

Applying S3 API to HCP

1056CI | 2 Days

This course is intended for cloud applications developers, architects and system administrators who manage or support object storage systems. In this course, you will learn how to use the Hitachi API for Amazon S3 (S3 API) with Hitachi Content Platform (HCP).

Completion of this course will earn you a [Hitachi Content Platform Amazon S3 API Application](#) digital badge.

Related Courses

Getting Started with REST API

TSI2764 | 1 Day

Get an overview of REST API for Hitachi Content Portfolio.

Introduction to REST API for Hitachi Content Platform

TXC6790 | 45 Minutes

Application engineers get basic knowledge necessary to code applications that take advantage of the HCP solution. It familiarizes you with key principles required to program REST-ful programmatic APIs for HCP. Hands-on lab activities are designed to reinforce the principles presented during the course.

* This closed-book, proctored qualification test is available using the [Kryterion Webassessor system](#), either as online-proctored or on-site at Kryterion testing centers.
