

# Object Storage Learning Path

## Hitachi Content Software for File (HCSF)

**Level up your operation and management expertise with Hitachi Content Software for File.**

The Hitachi Content Software for File (HCSF) learning path will help you acquire the skills you need to work with HCSF.

Learning Paths are suggested courses to reach a goal. Individual paths may vary according to experience and requirements.

### Getting Started with Hitachi Content Software for File (HCSF)

1111CCu | 1 Hour

This foundational course provides an overview of Hitachi Content Software for File (HCSF) Solutions. You will learn about the advantages of HCSF over other file management and storage products as well as explore some use cases. In this course, you will also learn how to set up a File System, create an NFS and mount it on a client, as well as add a cluster to the Active Directory.

### Managing Hitachi Content Software for File (HCSF)

1244CI | 2 Day

This intermediate course provides knowledge, skills, and comprehensive lab practice to articulate and demonstrate the operation and management of HCSF. The course focuses on the architecture; the setup of the protocol services for SMB, NFS, S3, and POSIX; and connecting HCSF to Hitachi Content Platform (HCP) and an HCP for cloud scale. Further, you will learn and practice how to set up and configure tiering and snapshot policies. Numerous hands-on lab activities facilitate building your skills to administer, configure, and integrate the key software products for HCSF solutions.

*Completion of this course will earn you a [Hitachi Content Software for File Administration](#) digital badge.*
